# SIMPLEX REPEATER

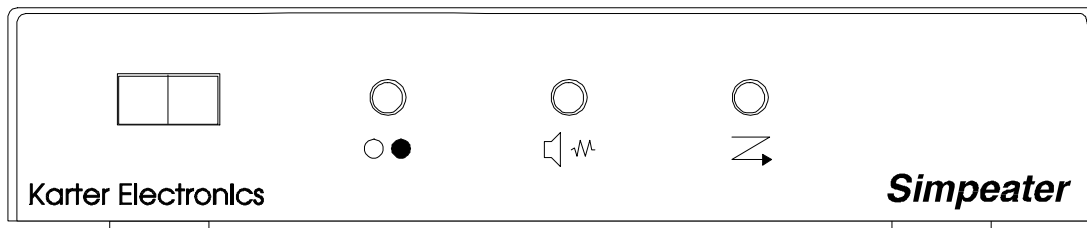

## Sim peater

A simplex repeater is a device for extending radio range on a single frequency. This is accomplished by recording an incoming radio message and then replaying it.

The new Simplex Repeater or Simpeater™ from Karter Electronics offers high quality of digital recording coupled with microprocessor control which will make this new product a leader in its field.

By using leading edge audio technology this product offers wide audio bandwidth with two different message durations.

The Simpeater™ has been designed for both speech and radio signalling formats such as 5 tone, 2 tone and DTMF. It is fully compatible with PL and DPL with its built in sub audio tone filter.

- " Universal Radio Interface
- " High Quality Recording Suitable For 5 Tone, 2 Tone and DTMF Signalling
- " Storage Time 60 or 90 Seconds
- " Overflow Warning Tone
- " Optional Automatic Gain Control
- " Front Panel On-Off Switch
- " Low Current, Suitable for Battery Powered Applications
- " Built in CTCSS, PL and DPL filter
- " Auxiliary Enable - Disable Input
- " Allows Base Radio to be Used as Normal

The Simpeater™ comes with a comprehensive manual covering all aspects of the product from detailed installation instructions with specific radio connection for many of today's most popular radios to comprehensive theory of operation. We also offer ready made leads and adaptors.
